

# 车身零部件涂层解决方案

Coating Solutions for Vehicle Body Components

— 环保的工艺过程，完全替代电镀并优于电镀

Environmentally friendly technology, providing an efficient substitution for electroplating process

车身部件使用星弧PVD涂层，不仅解决了装饰性，而且耐磨性和静音效果得到明显提高，更重要的是解决了环保法规带来的限制。这些部件使用了星弧涂层技术，汽车变得更安静、车身色彩更细腻、装饰搭配选择更多样化。

Stararc's decorative and wear resistant PVD coating on body components preserves the outer appearance of components, prolongs components' usage cycles, and aids in noise reduction. Most importantly, the PVD process is eco-friendly, complying with environmental regulations. Stararc offers a range of standard colors, as well as customized tones, in order to ensure the matching of colours with other parts of the vehicle.

## 涂层性能特点Coating Functions:

- ◆ 更高的结合力，大于70N
- ◆ 更光亮的表面
- ◆ 环保的生产过程
- ◆ High adhesion, above 70N on scratch testing
- ◆ Low surface roughness
- ◆ Environment friendly process

## 典型应用Typical Applications:

- ◆ 锁扣
- ◆ 门把手
- ◆ 装饰件
- ◆ Door buckles
- ◆ Door handles
- ◆ Decorative parts
